

Kids across the nation are approaching summer days of swimming, camp, vacations, and—in many cases—extra screen time. For most, this also means less time focused on educational pursuits like reading, math, and problem-solving. But encouraging children to stay engaged in learning throughout the summer may maintain and improve their knowledge.

In this month's World Book Wired, join us as we explore digital and reading resources, hands-on activities, and fun recipes we have to help combat the summer slump.

## BEAT THE SUMMER SLUMP

### WIZARD STUDENT

Stay focused with a variety of question types, curriculum-aligned games, and opportunities to earn badges. [Wizard Student](#) is a new way of learning—technology, data, and a smart algorithm in one!

### IN A JAM?

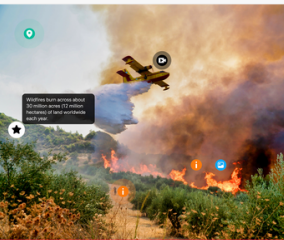

Our easy-to-make recipes from [Taste the World](#) are not only a good activity for long summer days, but also a great opportunity to help kids develop necessary academic, cognitive, and motor skills.

### DISTANCE-LEARNING

Keep students' minds sharp with our [distance-learning resources](#). Spanning all grade levels and available 24/7 from any device, these fun activities are perfect to use independently, even at a young age!

Say goodbye to boring static images and get your students' attention with interactive images—now live on Student by World Book! From the Sydney Opera House to fighting wildfires we have enriched our images—both [static](#) and [360-degree photos](#)—with "hotspots" that lead to fun facts, related articles, photo galleries, videos, audio clips, diagrams, and more. Use a VR headset if you have one!
