## 2. CLICK VIEW ASSIGNMENT. THEN CLICK START.

CORRECT ANSWERS TURN **GREEN**. THE PROGRESS BAR AT THE TOP INCREASES.

INCORRECT ANSWERS TURN **RED**. THE PROGRESS BAR AT THE TOP DECREASES.

5% [Earth in Space: Eclipses](#) Highest 5% 5%

Question

Which of these statements about the moon is FALSE?

Answer

- The moon has no life of any kind
- Earth is the only planet in the solar system with a moon.
- The moon is much smaller than Earth.

Feedback [NEXT](#)

Good job! Earth is **NOT** the only planet in the solar system with a moon. Five other planets have moons - Jupiter and Saturn each have over 60

5% [Earth in Space: Eclipses](#) Highest 5% 5%

Question

During a total solar eclipse, what is the path along which the moon's shadow passes across Earth called?

Answer

- the shadow path
- the path of totality
- the path of darkness

Feedback [NEXT](#)

During a total solar eclipse, the path along which the moon's shadow passes across Earth is called the path of totality.

TIP: READ THE FEEDBACK! THIS EXPLAINS WHAT THE CORRECT ANSWER IS TO HELP YOU LEARN AND GET THE QUESTION CORRECT NEXT TIME.

## 3. ONCE YOU REACH 100%, THE ASSIGNMENT IS COMPLETE AND MOVES TO YOUR ASSIGNMENT ARCHIVE.
