

Learning doesn't have to be boring! Our portfolio includes diverse products, including new print releases and continuously updated digital content, thousands of eBooks titles, and new assessment and tutoring tools built for educators like you. When considering which activities to blend into your lesson plan, nothing increases engagement, lesson comprehension, or test performance like our fun, yet educational, tools for learning.

In this month's **World Book Wired**, we're sharing blended and remote learning support, guidance, and helpful resources to make your transition back to school easier.

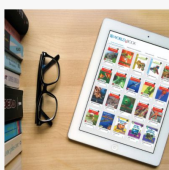

E-LEARNING INSPIRATION

COUNT & PLAY

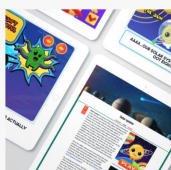

Count & play! [Early Learning's](#) "Butterfly Catch" brain game teaches basic counting skills along with color recognition to young children.

2,500+ EBOOKS

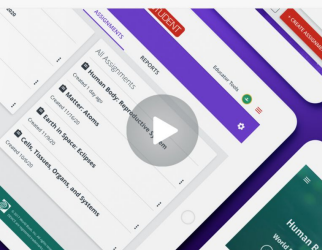

Discover our on-the-go [digital library](#) with thousands of engaging titles that support all reading levels and cover the entire curriculum.

GAMIFICATION

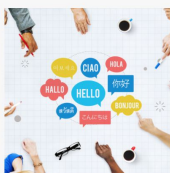

When faced with teaching challenging topics, try our curriculum-aligned math and science games for grades 3-8 across a variety of learning objectives.

Need help making up for lost learning? **World Book Wizard** is a new way of learning—technology, data, and a smart algorithm wrapped up into one! As learners use Wizard, teachers can analyze the data and better understand each student's individual needs, where they are struggling, and which methods of teaching are helping. Watch our [overview video](#) today.
